SUMMARY

Frontend Developer with practical experience building web applications using React and Next.js. I have worked in remote teams, built reusable UI components, reviewed code, and helped coordinate frontend tasks. I also work as a CTO(chief of technology officer) in a student freelance company, where I contribute to different projects. I enjoy solving problems, learning new technologies, and building simple and useful web experiences.

EXPERIENCE

Frontend Developer Team Lead Intern

Infinity Innovation - Remote

June 2026 - Present

- Led frontend development activities within the intern team.
- Built responsive web interfaces using **Next.js, React, and Tailwind CSS**.
- Created reusable components for different parts of projects.
- Coordinated frontend tasks and supported team members.
- Reviewed code and helped maintain frontend development standards.

Co-Founder & CTO

9call - Kigali, Rwanda

January 2026 - present

- Work mainly as a frontend developer on different software projects.
- Build responsive interfaces using **React, Next.js, JavaScript, and Tailwind CSS**.
- Create reusable components and connect frontend applications to APIs.
- Work with other team members to plan and build project features.
- Contribute to the technical direction of the company and development of its projects.

Frontend Developer Intern

Mastery Hub Rwanda – Kigali, Rwanda

April 2026 – June 2026

- Learned the company's development workflow and team working practices at the start of the internship.
- Worked with other interns on **Bobo250**, an e-commerce platform for selling electronic devices.
- Helped redesign the existing platform and improve its overall **UI and UX**.
- Improved product listing pages to make it easier for customers to browse and find products.
- Contributed to the payment flow used by customers to make payments and submit payment screenshots for confirmation.
- Worked with other interns to update different pages and features of the existing application.
- Helped complete and deliver the updated platform to the company at the end of the internship.

EDUCATION

RP College of Kigali, Kigali City – Rwanda

Pursuing The Final Year Advanced Diploma in Information Technology

2024 – Present

- Currently pursuing an Advanced Diploma in Information Technology.
- Participated in two KOICA Arduino training cohorts; my team was selected among the **top 3 projects in the first cohort** and the **top 5 projects in the second cohort**.

World Mission High School, Kigali City – Rwanda

A2 Certificate

2021 – 2023

- Finished in the top 3 of my class
- Served as Class Monitor for two years

Basic Figma

PROJECTS

A. Fast2Hire – Recruitment Platform

Infinity Innovation-Remote

Fast2Hire is a recruitment platform that helps companies find candidates based on their skills and helps candidates find jobs that match their profiles.

- *Built responsive and reusable UI components using **Next.js, React, and Tailwind CSS**.*
- *Helped organize the frontend folder structure and guided the team on clean and maintainable code.*
- *Assigned frontend tasks and helped coordinate work among team members.*
- *Reviewed teammates' work and checked that the implementation matched the **Figma designs**.*
- *Worked on different pages and features across the platform, building responsive UI and improving the user experience based on project requirements and Figma designs.*
- *Used **TanStack Query** to consume and manage data from backend APIs.*
- *Displayed AI-generated job matching results provided by the backend, including the candidate's match percentage for each job.*
- *Worked with the backend team to connect frontend features with REST APIs.*
- *Helped improve the overall user experience and consistency of the platform.*

Technologies: Next.js, React, TypeScript, Tailwind CSS, TanStack Query, REST APIs

Live project: <https://dev.fast2hire.com/>

B. Bobo250 E-commerce Platform

Mastery Hub of Rwanda – Kigali, Rwanda

Bobo250 is an e-commerce platform for selling electronic devices. Customers can browse available products, choose the products they are interested in, make payments using their phones, and submit payment screenshots for confirmation before the products are delivered.

- Started with an introduction to the company's workflow, development process, and team working practices.
- Worked with other interns on Bobo250, a client e-commerce platform.
- Helped improve the existing platform by redesigning and updating its overall UI and user experience.
- Improved the product listing interface to make products easier to browse and understand.

- Contributed to adding and improving the payment system on the platform.
- Worked with other interns to update different parts of the existing application.
- Tested and reviewed frontend changes to make sure the new features worked as expected.
- Worked as part of a team to complete and deliver the updated platform to the company at the end of the internship.

Technologies: Next.js, TypeScript, Tailwind CSS, REST APIs

Live project: <https://bobo250.vercel.app/>

C. Urugo(AI-Powered Home Search & Property Management Platform)

9call - Kigali, Rwanda

Urugo is our own platform for rental property discovery and management in Rwanda. The platform is currently under active development.

- Contributing mainly to the frontend development of the platform.
- Building responsive pages and reusable UI components.
- Working on the frontend structure and user experience.
- Connecting frontend features with backend APIs.
- Working with the team to develop and improve different platform features.

Technologies: Next.js, TypeScript, Tailwind CSS, REST APIs

Frontend Repository: <https://github.com/Urugo-software/Urugo-Frontend>

D. 9Call Company Website

9call - Kigali, Rwanda

The 9call company website presents the company, its services, projects, and work to potential clients and partners. The website is currently live for testing.

- Contributed to the frontend development of the website.
- Built and improved responsive UI components.
- Worked on different pages and sections of the website.
- Tested the website internally and fixed UI issues found during development.
- Helped improve the overall consistency and user experience of the website.

Technologies: Next.js, TypeScript, Tailwind CSS

Live: <https://9call.vercel.app>

LEADERSHIP

Frontend Developer Team Lead - Infinity Innovation

- Led frontend tasks within the intern team, assigned work, reviewed code, and helped maintain frontend quality and consistency.

Co-Founder & CTO - 9call

- Helped lead the technical direction of the company and contributed as a frontend developer across projects, including the ongoing development of Urugo.
